

Alexey Lagunin is Head of Bioinformatics Department in Institute of Biomedicine in Pirogov Russian National Research Medical University and Chief Researcher of Laboratory for Structure–Function-Based Drug Design at the Institute of Biomedical Chemistry. He received a M.S. (doctor biophysicist, specialty medical cybernetics) from Russian State Medicinal University, Russia in 1998; Ph.D. in biochemistry with Prof. Vladimir Poroikov at Orekhovich Institute of Biomedical Chemistry, Russia in 2001; Dr.Sci. in mathematical biology and bioinformatics at Orekhovich Institute of Biomedical Chemistry, Russia in 2012. He has been awarded by the Russian Academy of Sciences (RAS) as Professor of RAS (2016). He has authored > 150 publications in the field of (Q)SAR modeling and bioinformatics. Research interests: bioinformatics, chemoinformatics, system biology, *in silico* toxicology and computer-aided drug discovery.
