

Vladislav Sukhachev is a Junior Research Fellow at the Laboratory of Big Data Analysis for Digital Pharmacology. He also works as a Research Assistant at the Laboratory of Structure-Function Based Drug Design. He received his Master's degree from the Lomonosov Institute of Fine Chemical Technologies, majoring in Chemistry. He is currently pursuing his postgraduate studies on the topic of computer-aided prediction of drug-drug interactions and the associated adverse drug reactions, as well as synergistic effects on tumor cell lines. His work utilizes methods such as QSAR (Quantitative Structure-Activity Relationship) and network pharmacology. Furthermore, he is also involved in research addressing the problem of drug-likeness.
