Arina Golubeva graduated from the Faculty of Medicine and Biology at Volgograd State Medical University with a degree in Medical Biochemistry. She is currently a junior researcher at the Laboratory of Information Technologies in Pharmacology and Computer Modeling of Medicines at the Research Center for Innovative Medications, as well as an assistant at the Department of Pharmacology and Bioinformatics at VSMU. She is pursuing postgraduate studies in Pharmaceutical and Toxicological Chemistry and Bioinformatics. Her interests are focused on the search for substances with antimicrobial activity and assessment of toxicity using artificial intelligence methods.
