

Jaime Tamayo Ramos is an emerging researcher and science communicator with a solid academic foundation in Chemistry. He earned his bachelor's degree in Chemistry from the Universidad Nacional Mayor de San Marcos, Peru. His research experience includes collaborations with Dr. Romero-Parra in Organic Synthesis at the University of Chile and with Dr. Warneke in Analytical Chemistry at Leipzig University. Currently, Jaime is working to contribute the fields of bioinformatics and computer-aided drug design. Beyond his research, he is the founder of the Chemistry Student Society for Research-Peru, reflecting his strong commitment to advancing scientific development in his country and promoting science through webinars, conferences, and community outreach initiatives.
