

Dr. Petr Popov received MSc in molecular biophysics at Moscow Institute of Physics and Technology, Ph.D. in Applied Math and Computer Science at Inria – Grenoble Rhone-Alpes (France), where he was developing algorithms for molecular modeling and computational chemistry.

Dr. Popov worked at Moscow Institute of Physics and Technology (Russia) and University of Southern California (USA), where he developed structure-based tools to study the structure and function of transmembrane proteins.

Later Dr. Popov worked at Skolkovo Institute of Science and Technology Russia and Constructor Institute of Technology (Germany), with the main focus on machine learning approaches applied to structural biology problems.
